-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Information Disclosure Statement***

The information disclosure statement filed August 1, 2001 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. Specifically, the reference to Kirk Othmer Encyclopedia of Chemical Technology, Third Edition, Volume 18, pp. 485-488 has not been supplied. The U.S. Patent references have been considered but the chemical technology encyclopedia has not been considered as evidenced by the line through the citation on the form PTO-1449. If the applicant would like this reference considered a copy of the reference along with a supplemental IDS should be filed.

### ***Claim Objections***

Claim 27 is objected to because of the following informalities: Claim 27, line 7, “elementoperationally” should be two words. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

Art Unit: 2851

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 12-15, 17, 19, 45, 47, 55-57, and 60 are rejected under 35 U.S.C. 102(b) as being anticipated by Goldenberg (U.S. Pat. No. 5,760,955). Goldenberg teaches a method for facilitating a reduction of speckle in a screen receiving light from a light source comprising positioning at least one optical path distributing screen element 50 such that the light originating from a light source passes through the screen element and emerges decorrelated from the screen element toward an audience space, and positioning an angular distribution element 40/48 between the APDE and the audience space such that the angular distribution element distributes the decorrelated light from the screen element toward the audience space. The distributing element may be no-imaging elements. Element 46 is the light absorbing layer, 48 is the diffuser, 52 is the Fresnel/Field lens and tip regions 44 distribute the light. The applicant is directed to review figures 10-12.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 27, 29, 37-40, 42, are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldenberg (U.S. Pat. No. 5,760,955) in view of Yoshida (U.S. Pat. No. 5,066,099). Goldenberg teaches the salient features of the claimed invention except for a light engine positioned in a

Art Unit: 2851

housing. Yoshida teaches that it was known to utilize a light engine 7 positioned in a housing 12. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the features as taught by Yoshida for the purpose of producing an enclosed projection television system.

***Allowable Subject Matter***

Claims 22-26 and 63 are allowed.

Claims 3-11, 16, 18, 20-21, 28, 30-36, 41, 43-44, 46, 48-54, 58-59, and 61-62 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
